

SBE CHAPTER 70 - CLEVELAND/AKRON

SBE 70 MINUTES

Tuesday, February 7th, via Zoom

Gather at 6:30pm - Meeting 7:00pm - Presentation to follow

Presentation by Cornelius Gould and Mike "Catfish" Dosch, Angry Audio, LLC

FEBRUARY 7th MEETING INFO

In order to fulfill our 'January/February' Meeting slot, and avoid any conflict with anyone's Valentine's Day plans, our next meeting is a week earlier than would be typical for February. We again welcome Cornelius Gould and Mike "Catfish" Dosch of Angry Audio, LLC. Corny and Catfish will fill us in on the latest going on at Angry Audio with audio processing and new projects and products either recently out or in the works, including discussion behind things they've needed to consider when designing digital audio processing to emulate what happens in the analog world. It should be another interesting and informative presentation.

Join us via Zoom on Tuesday February 7th. Gathering at 6:30pm, with our SBE Chapter 70 Meeting at 7pm and the presentation to follow. The meeting link as usual is with this newsletter.

See you then!

John Hovanec, CSRE/CBNT DRM AMD
SBE Chapter 70 Program Chair

CHAIRMAN'S CHAT

Hello all members and friends of SBE Chapter 70. I hope you all had some time to relax over the holidays. I'd like to thank WAPS / The Summit and Steve Savanyu for the great meeting in December. Steve's presentation was outstanding, even us microphone geeks learned something. It was also great to see WAPS after their move to the new facility. They are the most eclectic station in the area, and Corny is running the processing, which is part of why I listen so often.

In national news, the FCC has extended the filing date for the EAS Test Reporting System (ETRS) Form One to February 28, 2023. This is required to be filed annually, but due to delays in testing the National EAS via a National Periodic Test (NPT) in 2022, the Commission moved the 2022 filing to the new date. The delay was due to continuing Covid-19 issues. FEMA has not yet posted a date for the next national test, but unofficial comments indicate the NPT may occur during the first part of 2023.

(Continued on Page 2)

SBE CHAPTER 70 - CLEVELAND/AKRON

Chairman's Chat (continued from Page 1)

There are also reports that uploading of the required Issues and Programs files has been problematic. If your station is having issues, document them and continue to attempt the uploads until you are successful. The FCC only extended those file uploads until January 30th.

The SBE will offer a new webinar on Thursday, February 16 @ 2 p.m. This presentation will focus on the testing, measurement and monitoring of ATSC 3.0 broadcast systems. It will provide a brief overview of the IP and RF signal parameters and discuss the "When, Where and How" of testing, measurement and monitoring of signal elements. These elements must be measured and monitored to ensure standards compliance and interoperability with downstream transmission and receiving devices. Hardware- and software-based devices and systems used to test, measure and monitor the signals will be discussed. A live demonstration of the measurement and monitoring of actual "on air" ATSC 3.0 transmission systems with currently available software-based products will be included.

See you on the zoom,

Blake E. Thompson CBNT
BET Broadcast Engineering
SBE Chapter 70 Chairman
OAB/MAB/WVBA ABIP Inspector
